jQuery SIFR plugin! New plugin made by Gilles vd Hoven

This page is a demonstration of the jQuery SIFR plugin, written by Gilles van den Hoven after seeing Mike's version which he made some time ago. Since there was a need for such a plugin on the jQuery list i thought why not make one :)

If you want to use this plugin you'll have to take a look at the documentation at Mike's site. Since he is one of the original creators, i don't want credits for that. Most options he added are also in this version available.

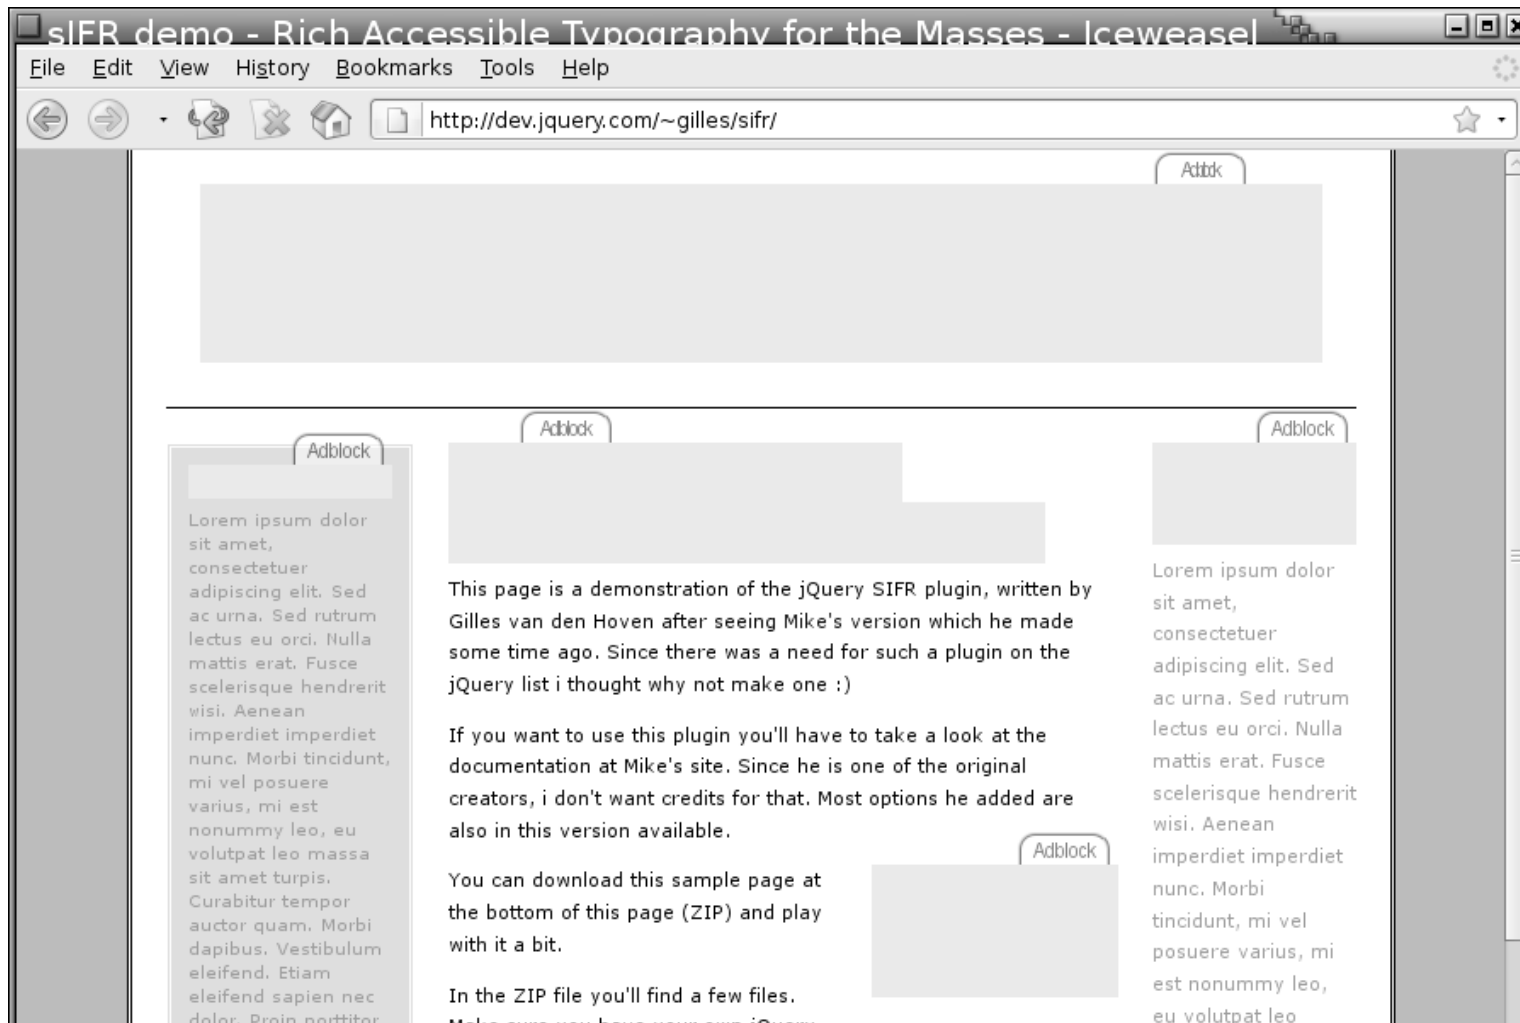

You can download this sample page at the bottom of this page (ZIP) and play with it a bit.

In the ZIP file you'll find a few files.
Make sure you have your own jQuery
